

# THE LEADER OF THE PACK

Features	Basic Containment Systems	Invisible Fence® Brand	Notes
Digital Radio Signal	●	●	<b>Industry standard.</b> Most pet containment systems use digital radio signals.
Replaceable Batteries	●	●	<b>Industry standard.</b> Most pet containment systems use replaceable batteries. This helps ensure that your pet's receiver collar is always ready for use by avoiding the need to recharge at inconvenient times. The lifespan of replaceable batteries varies based on how active your pet is at testing their boundaries.
CE & RoHS Compliant	●	●	<b>Industry standard.</b> Most pet containment systems are CE & RoHS Compliant. It is a requirement for all electronic products sold within the European Economic Area (EEA).
Limited Lifetime Warranty	●	●	<b>Industry standard.</b> Many pet containment systems have limited lifetime warranties on their products.
International Dealer Network	●	●	<b>Industry standard.</b> Many pet containment systems have an international dealer network.
Internal & External Lightning Protection	●	●	<b>Industry standard.</b> Many pet containment systems have internal and external lightning protection.
One-Year Money Back Containment Guarantee		●	<b>Exclusive to Invisible Fence.</b> If we cannot successfully protect your pets from leaving your property within the first year, we will fully refund you the price of the equipment.
CF-3000 Programming Tool		●	<b>Exclusive to Invisible Fence.</b> Provides pet's Computer Collar® Receiver with the latest firmware updates, checks battery performance and programs millions of different settings to ensure that pets receive uniquely customized correction levels to his/her temperament. Additionally, all the corrections your pet receives are tracked to help your certified pet trainer calibrate the system to your pet's exact needs. No more, no less.
Perfect Start™ Plus Training		●	<b>Exclusive to Invisible Fence.</b> Our training protocol was developed and approved in collaboration with leading animal behaviorists to ensure your pets receive a training as unique as they are. Personalized care is a hallmark of our training services.
GPS Technology		●	<b>Exclusive to Invisible Fence.</b> Our one-of-a-kind GPS containment solution uses 32 satellites to create a totally-custom wireless boundary around properties 3 acres and up.
Different Rules for Different Pets™ Technology		●	<b>Exclusive to Invisible Fence.</b> Designed exclusively for multi-pet homes by letting you set custom and shared rules for each pet and how they interact with each of our solutions.
Independent correction levels for Indoor and Outdoor areas		●	<b>Exclusive to Invisible Fence.</b> Our Computer Collars offer unique correction settings for indoor and outdoor solutions in your home. This reinforces your pet's training by providing a custom correction level that takes their temperament and environment into consideration.
Behaviorally-Correct No Run-Through Technology		●	<b>Exclusive to Invisible Fence.</b> Our Boundary Plus® System's No Run-Through Technology offers you the industry's only comprehensive corrective field for all points outside of your fence. Whereas basic containment systems unintentionally "reward" escaped pets with safe space on the far side of a bounded 12' signal field, our system uses behaviorally-correct technology to provide consistent correction rules and reinforce your pet's training that home is where they are safest.
Free Pass Technology		●	<b>Exclusive to Invisible Fence.</b> Our Computer Collar's polarity-detection always knows your pet's proximity to the buried cable, making it the first system to provide a behaviorally-correct "free pass" back to the yard if your pet should test the boundary.
Doorman™ Automated Pet Door		●	<b>Exclusive to Invisible Fence.</b> Our automated pet door operates by the same Computer Collar as our indoor and outdoor solutions, giving your pets free passage indoors and out—with no break in their protection and no interruption to your day.
